

5 reasons why you should choose: genuine Senco fasteners

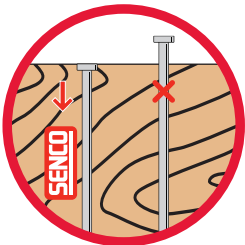

Senco fasteners for Senco tools

Less tool jams = less down time. Guaranteed to fit in your tools. The tightest manufacturing tolerances in the industry.

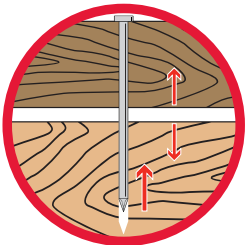

According to local norms and directives

The highest specification adherence in the industry, with available approvals such as: SITAC, DIN, CE and Eurocode 5.

Sencote®: more complete drives

Fewer partial-drives. Superior Sencote coating acts as a lubricant to ensure more, fully completed drives.

Sencote®: highest withdrawal values

Less pull-outs. Sencote is a permanent adhesive, scoring Senco fasteners the highest withdraw values in the industry.

Full ring for coilnails: highest withdrawal values

Senco's full ring coilnails provide more grip and better withdrawal values.
